Hello,
I hope this message finds you well.

We are a small family of four living in Morocco. Our first child was born in 2018, and after three years, we discovered that he suffers from ADHD (Attention Deficit Hyperactivity Disorder). We began his treatment with Dr. Yamna Krioul, and we sent lab tests to the Mosaic Laboratory in the United States. After receiving the results, the doctor prescribed some medications from the New Beginnings website.

We ordered two types of medication twice: ***Focus Mate*** and ***Equazen Pro***, and we used our email address **morad201012@gmail.com** for the orders. Today, we need more of this medication as well as other supplements. However, when I selected the items on your website, the total amount to be paid was $555.

Therefore, I kindly and respectfully ask you to consider offering us a discount, as our financial resources are limited. Additionally, our child has suffered from other health conditions, such as spina bifida, for which he underwent surgery—thankfully, it was successful, and we have spent a lot of money on his treatment, especially since the healthcare coverage system in Morocco does not provide much support and suffers from many shortcomings.

We would be deeply grateful if you could assist us with this matter. Thank you very much.

These are the medications we need from your website
